APPLICATIONS

IIRSM Accident Investigation

Description

The Accident Investigation course is created to provide workers, in all sectors, with the practical knowledge, skills, tools and techniques to be able to conduct an incident investigation and record findings to influence the development of organisational safety management systems and the effective control of risk.

This course, delivered by experienced health & safety professionals, provides time for practical sessions and exploring the organisation's in-house systems and processes.

Depending on your need, the course content can be tailored to meet your key concerns, alongside specific local requirements.

Aims

Delegates will improve their knowledge and understanding of accident/incident investigation

Objectives

Delegates will:

- Understand why people have incidents
- Understand how to conduct effective incident investigations
- Recognise what to do after an incident

Duration 1 Day

Modules

- Accident investigation definitions
- Legal background
- Understanding people
- Incident investigation processes
- Dealing with witnesses
- Root causes
- Completing the forms
- Learning from an investigation
